21. Current and deferred income tax recognition principles and method

- Corporate income tax expenses (or corporate income tax income): is total current and deferred income tax expenses (or total current and deferred tax) in determining profit or loss of a period.
 - + Current income tax expenses: is corporate income tax payable calculated on taxable profit during the year and current corporate income tax rate. Current income tax is calculated on taxable income and applicable tax rate during the tax period. Difference between taxable income and accounting profit is from adjustment of differences between accounting profit and taxable income in accordance with current tax policies.

- + Deferred income tax expenses: is corporate income tax payable in the future arising from: recognising deferred income tax payable during the year; reversing deferred tax assets recognised in previous years/periods; not recognising deferred tax assets or deferred tax liabilities arising from transactions that directly recorded to equity.
- The Company has an obligation to pay income tax at rates ranging from 15% to 22% of taxable profits, depending on principle activities of its factories.

22. Classification of financial instruments

Solely for the purpose of providing disclosures about the significance of financial instruments to the Company's financial position and results of operations and the nature and extent of risk arising from financial instruments, the Company classifies its financial instruments as follows:

a. Financial assets

➤ **Financial assets at fair value through profit or loss**

A financial asset at fair value through profit or loss is a financial asset that meets either of the following conditions:

- It is considered by management as held for trading. A financial asset is considered as held for trading if:
 - It is acquired principally for the purpose of selling it in the near term;
 - There is evidence of a recent pattern of short-term profit-taking; or
 - A derivative (except for a derivative that is financial guarantee contract or a designated and effective hedging instrument).
- Upon initial recognition, it is designated by the Company as at financial assets at fair value through profit or loss.

➤ **Held-to-maturity investments**

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and a fixed maturity that the Company has the positive intention and ability to hold to maturity, other than:

- Those that the Company upon initial recognition designates as at fair value through profit or loss;
- Those that the Company designates as available-for-sale; and
- Those that meet the definition of loans and receivables.

➤ **Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those:

- That the Company intends to sell immediately or in the near term, which are classified as held for trading, and those that the entity on initial recognition designates as at fair value through profit or loss;
- That the Company upon initial recognition designates as available-for-sale; or
- For which the Company may not recover substantially all of its initial investment, other than because of credit deterioration, which are classified as available-for-sale.

➤ **Available-for-sale financial assets**

Available-for-sale financial assets are non-derivative financial assets that are designated as available for sale or that are not classified as:

- Financial assets at fair value through profit or loss;
- Held-to-maturity investments; or
- Loans and receivables.

b. Financial liabilities

➤ **Financial liabilities at fair value through profit or loss**

A financial liability at fair value through profit or loss is a financial liability that meets either of the following conditions:

- It is considered by management as held for trading. A financial liability is considered as held for trading if:
 - It is incurred principally for the purpose of repurchasing it in the near term;
 - There is evidence of a recent pattern of short-term profit-taking; or
 - A derivative (except for a derivative that is financial guarantee contract or a designated and effective hedging instrument).
- Upon initial recognition, it is designated by the Company as financial liabilities at fair value through profit or loss.

➤ **Financial liabilities carried at amortised cost**

Financial liabilities which are not classified as financial liabilities at fair value through profit or loss are classified as financial liabilities carried at amortised cost.

The above described classification of financial instruments is solely for presentation and disclosure purpose and is not intended to be a description of how the instruments are measured. Accounting policies for measurement of financial instruments are disclosed in other relevant notes.

V. FINANCIAL RISK MANAGEMENT:

Financial risk factors:

- The Company assesses the following risks from its use of financial instruments:
 - Market risk
 - Liquidity risk
 - Credit risk
- The Board of Management has overall responsibility for the establishment and oversight of the risk management principles. The Board of Management has established policies to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities.

1. Market risk

- Market risk is the risk that fair value or future cash flows of a financial instrument will be affected by the volatility of market price. Market risk includes 3 types of risk: currency risk, interest rate risk and other market price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.
 - a. Currency risk
- The Company is exposed to currency risk on sales and purchases that are denominated in currencies other than VND. These currencies are mainly USD and EUR (other currencies have insignificant transactions).
- The Company's exposure to currency risk is managed by retaining the exposure at an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term over-exposures and planning a payment schedule of foreign currencies with the highest possible accuracy. During the year, the Board of Management decided to use USD buying forward contract to settle USD loans when they fall due, in order to hedge the interest rate fluctuations.

INTERIM FINANCIAL STATEMENTS

For the accounting period ended 30 June 2015

b. Price risk

- The Company has equity investments to listed and unlisted companies and is exposed to risk from price fluctuation of these investments. Risk factors impacting these investments' results include operating result and financial position of investees and market conditions. The Board manages risk related to operating result and financial position by selecting industries and entities to invest in. Risk factors related to market conditions are itself impacted by general economic condition of Vietnam and investors' behaviours, which are out of the Board's control. These factors have caused market conditions to be volatile in recent years.
- For investments in listed securities, if the securities' prices increased/decreased by 10% with all other variables (including tax rate) being constant, the Company's net profit after tax would have been VND 7,347,809,118 higher/lower corresponding to the tendency price changes.

c. Interest rate risk

Interest rate fluctuation does not have any significant impact on the Company's net profit after tax.

2. Credit risk

- Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables and investments in debt securities.

- Exposure to credit risk:

The total of carrying amounts of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as follows:

INTERIM FINANCIAL STATEMENTS

For the accounting period ended 30 June 2015

- The Company's exposure to credit risk from investing in bonds is influenced by individual characteristics of the instrument issuer. In managing this risk, the Company management analyses the creditworthiness of the issuer before buying. Management assessed that the issuers had good track records and believe that credit risk on those instruments is low.
- There was no allowance for diminution in value of held to maturity investments during the period.
 - Trade and other receivables
- The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer.
- The Company's management has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. Credit purchase limit is established for each customer, which represents the maximum amount without requiring approval from the Board of Directors. Customers that fail to meet the Group's benchmark creditworthiness may transact with the Group only on a prepayment basis.
- The Company makes allowance for diminution in value to represent estimated losses from trade and other receivables and investments. Main components of the allowance are specified losses relevant to the specific major losses to each customer and the overall losses of similar financial assets, which are determined when these risks could have been incurred but not identified. The overall losses are determined on statistic data of historical payment of the similar financial assets.
- a. Financial assets neither past due nor impaired:
 - Cash in banks and investments in bonds that are neither past due nor impaired is bank deposits and bond investments with high credit rating in Vietnam. Trade and other receivables that are neither past due nor impaired are mainly from companies with good collection history with the Company.
 - Trade and other receivables of the Company that are neither past due nor impaired amount to VND 2,585,238,534,840 (2014: VND 2,050,158,271,400)
- b. Financial assets overdue and/or impaired:
 - There are no other financial assets which are overdue and/or dilutive but receivables.
